

## ProVac® PLC-700/1000 TP Vacuumsystem

**Outside as you know it.**

**Inside as you want it!**

This smart and "bright" system is as powerful as ever and now combines huge suction-capacity, with userfriendly and intuitive operating and monitoring capability.

**With measured volume of air!**

Remarkably compact in size it is designed for die casting machines of 6'000 - 44'000 kN and for really BIG casts.

Economic operation-mode of the vacuum-pump, running only when needed.

- Various parameter-setting options
- Vacuum less than 20 mbar
- Graphic display of vacuum-curves and production-history, with Ethernet remote-control
- Storage of non-volatile "recipees" to monitor the quality of the casts
- 700-litres tank with 1 or 2 pumps 63 m<sup>3</sup>/h
- Optional: 1'000-litres tank with 1 or 2 pumps 63 m<sup>3</sup>/h
